Pittsburgh, PA, (408) 940-2300 [sabrina3@andrew.cmu.edu](mailto:sabrina3@andrew.cmu.edu)

## PROFESSIONAL EXPERIENCE

---

### CARNEGIE MELLON UNIVERSITY, Pittsburgh, PA

*M.S. Electrical & Computer Engineering, AI Engineering, Aug 2026 - Expected Dec 2027*

Coursework: Introduction to Machine Learning/ Systems & Toolchains for AI Engineers/ Introduction to Deep Learning and Pattern Recognition for Computer Vision | Capstone: Robustness & source attribution for generated images

### enthreads

*Co-founder & Chief Product Officer, Sep 2023 - Feb 2026*

Lead product, strategy, and customer acquisition at enthreads - a GenAI startup that enables evaluation-guided optimizations and multi-agent workflows for large-scale enterprise RAG systems.

- Collaborated with enterprise clients including **Taipei Veterans General Hospital** and **Chunghwa Telecom** to deploy AI systems, including a **YOLOv7-based emergency inventory system** and multi-agent RAG pipelines for regulated medical knowledge using **AutoGen (a.k.a Microsoft Agent Framework)**, **LlamaIndex**, and **LangChain**.
- Developed a safety-focused evaluation stack for healthcare AI combining **TruLens**, **LLM guardrails**, **open-source evaluators**, and **human feedback loops** to evaluate retrieval quality, response reliability, and model safety.
- Co-authored "Revolutionizing Emergency Medication Management: AI-Driven Color-Coded Drug", an abstract accepted at IEEE EMBC 2025, on AI-assisted ambulance inventory automation.

### SUPERMICRO, San Jose, USA

*Product Engineer, Aug 2020 - Aug 2022*

Manages 1U/2U high-performance cloud servers [Hyper-S series](#) for data centers, enterprise, and 5G Edge chassis product from development to massive production and ensures time-to-market product launch and on-time delivery.

- Lead the Hyper-S 2U server projects from concept to production stage.
- Managed product specifications, design, schedules, ODM partners, and manufacturing execution across Asia.
- Reduced NRE costs by 25% and tooling costs by 20% through redesign and tooling reuse.
- Conducted new product feasibility and placement evaluations.

### QISDA, Taoyuan, Taiwan

*Senior Mechanical Engineer, Apr 2017 - Oct 2019*

Designed and manufactured high-volume LCD monitors for **Dell**, achieving successful mass production of [P2219H/ HC](#) and [U2520D](#) for 200,000 units/year, via collaboration with internal departments, vendors, and factories.

Maintenance of existing models, i.e. **AW3418DW**, **P2217H**, etc.

- Led mechanical architecture, 3D/2D design, RFI/RFQ, cost optimization, and design-for-manufacturing activities.
- Building 3D models and releasing 2D drawings of plastic parts, sheet metal chassis, PCB, and assembly with ProE/ CAD or drafting equipment. Collaborated with internal teams, vendors, and factories to resolve production issues.
- Benchmarked competing ODM products to inform design and cost tradeoffs.

### WIWYNN, New Taipei City, Taiwan

*Mechanical Engineer, Oct 2015 - Oct 2016*

Developed and manufactured enterprise-grade tool-less [2U3Node OCP cloud server](#) for both international clients (**Meta**, formerly **Facebook**) and internal clients.

### NATIONAL CHENG KUNG UNIVERSITY HOSPITAL, Tainan, Taiwan

*Research Assistant, Jan 2014 - Jun 2015*

National Science and Technology Council, Taiwan-funded project (PI: Prof. Chung-Dann Kan (Department of Surgery))  
"Smarter All-In-One integrated intelligence appliance for hemodialysis patients- Evaluation of vascular stenosis severity using phonography techniques"

## EDUCATION

---

### NATIONAL CHENG KUNG UNIVERSITY

*M.S. Department of Aeronautics and Astronautics - 2015*

Master's thesis titled "[Evaluation of Arteriovenous Shunt Stenosis induced Phonographic Signal on Hemodynamics in Hemodialysis Patients.](#)"

GPA: 3.57/4.0
